

Heart CARE corp.

INTRODUCING

Multifunction Cardiogram™ Testing

Identifying Coronary Artery Disease with the highest accuracy available.

MCG™ IS THE FIRST EARLY DETECTION TEST FOR
CARDIOVASCULAR DISEASE WITH TRUE PREDICTIVE CAPABILITIES.

MCG™ Technology Identifies

Coronary Artery Disease
Microvascular Disease
Rhythm Disturbances
Heart Stiffening
Myocarditis

Indicators of Plaque Instabilities
Even low-level Blockages

In less than 10 minutes, the Multifunction Cardiogram™ measures the health of the entire cardiovascular system, assigning a representative score of 0-22. MCG identifies underlying conditions up to 6-8 years before many patients even experience symptoms, allowing physicians the precious time needed to reverse disease and save lives. Talk to your provider about getting your MCG™ Scan today!
